BRAND GUIDE · OCTOBER 2026

PHYGITAL MEMORY

Locked notes your agent can remember.

THE IDEA

The knot: one wire ties a loop inside the seal, like a string tied round a finger so you remember. Both ends are sparks: you and your agent. The loop is what's held safe between them.

THE FEELING

Warm, clear, made by a person. Same family as Phygital Brain and Phygital Key: the round seal, wires and sparks, flat surfaces, three fonts. Dark is the default theme, light is a full second theme.

COLOUR

LIME IS YOU. ULTRAMARINE IS THE SPARK.

Lime is your memory and you: the logo, buttons, links, focus. Ultramarine is the spark: your agent at work, a note it opened, a door that needs a yes. Status always carries a word, never colour alone.

DARK THEME (DEFAULT)

Ground #0B0D12	Surface #161A22	Recessed #07080C
Lime #C8F031	Ultramarine #4D5BFF	Text #F1EDE4
Lime tint #2A3308	Ultramarine, interface #8A94FF	Muted text #A7A39A

LIGHT THEME

Ground #F4F6F9	Surface #FFFFFF	Recessed #E6EAF0
Lime, interface #566E00	Ultramarine, interface #3B47E6	Text #0B0D12
Lime tint #F3FBD9	Ultramarine tint #E8EAFF	Muted text #4A5160

Bright lime #C8F031 is a logo and fill colour. As text on a light ground it nearly disappears (1.2:1), so light mode uses deep lime #566E00 (5.4:1). Ultramarine #4D5BFF is too dark for text on night (3.9:1), so dark mode uses #8A94FF (7.2:1) and light mode #3B47E6 (6.0:1). Night text on lime is 14.8:1, white text on ultramarine 4.9:1.

RULES

Logo	Never recolour, redraw or rotate. Below 32px use the favicon file, which has a thicker wire and a simpler knot. Write the name exactly as "Phygital Memory".
Shape	Cards 10px radius, buttons and fields 6px, tags and rows 4px, the seal always round.
Depth	Flat with a hairline. No gradients, no glow.
Words	Plain and short. Say "your agent", not a product name. Tagline: "Locked notes your agent can remember."
